Software Engineer, Havok, Microsoft

Aug, 2018 - Feb, 2020

- Developed features and improvements across the Havok SDK suite focussing primarily on the Visual Debugger (VDB), Physics, and Havok Graphics (HKG); but also contributing to the UE4 integration, Cloth, and AI;
- Support developers by tracking & fixing bugs, implementing custom features, and identifying client errors
- Manage relations with clients; Identify risks & set expectations; Use feedback to drive product roadmaps;
- Helped ship multiple AAA titles across many studios & game engines;

Teaching Assistant, University of Pennsylvania | Procedural Graphics (CIS 566)

Jan – May, 2018

Research Assistant, SIG Center for Computer Graphics

May – Aug, 2017

SUBLIMINALLY DIRECTING GAZE IN VR under Dr. Stephen Lane at the University of Pennsylvania

- Developed a VR game that used visual stimuli to subliminally (without conscious perception) direct user attention
- Supervised & taught an undergraduate intern working on the project; Implemented a realtime CMA-ES algorithm
